SPECIFICATIONS

ISSUING OF ELECTRICAL CERTIFICATES OF COMPLIANCE FOR THE OLD, NEW CIVIC CENTRE AND OTHER BUILDINGS OF SOL PLAATJE MUNICIPALITY

1. INTRODUCTION/BACKGROUND

An electrical inspection refers to the thorough checkup of the electrical connections and wiring installed in your home or business. The Electrical Inspection is by far the most complicated of the five involving not just an entire book of regulations, SANS10142-1 Electrical Installation Regulations, but also includes the occupational health and safety act, and of course these regulations change from time to time.

The old, the new civic centre and other buildings of Sol Plaatje Municipality require a periodic inspection and testing of electrical installation. An electrical periodic inspection and testing is necessary because all electrical installations deteriorate due to a number of factors such as damage, wear and tear, corrosion, excessive electrical loading, ageing and environmental influences. Electricity can be seen as an 'invisible danger' that can cause people to have shocks, burns or even death, as well as severe damage to properties, fires and explosions.

Periodic Inspection & testing should only be carried out by an electrical competent person, such as a registered electrician.

While it may seem like a large expense for an electrical inspection, we must remember that proper inspections can protect the building from potential dangers and larger expenses in the long run. Catching a wiring issue or surge protection problem early can save enormous amounts of costs.

2. OBJECTIVE OF SPECIFICATION

The purpose of this specification is to outline the requirements for the **as and when appointment of an Electrical Contractor/Service Provider** to inspect and issue certificates of compliances for the old, the new civic centre and other buildings of Sol Plaatje Municipality. This is a contract that is expected to last for a once off period pending to the needs of the works on an as and when basis and/or to a maximum value **not exceeding R200 000.00**, whichever precedence comes first shall determine the duration of the contract.

3. SCOPE OF WORK

The successful bidder shall be required to utilize their own electrical spares and material by doing a thorough electrical inspection of the old, new and other buildings of Sol Plaatje Municipality. The bidder must: a) find if there are any potential electrical shock, risks and/or fire hazards, b) reveal if any electrical circuits or equipment are overloaded, c) Identify defective electrical work and d) highlight any lack of earthing or bonding. In addition, tests must be carried out on wiring and fixed electrical equipment, to ensure these are also safe. The successful bidder shall adhere to applicable design, construction and safety standards and regulation during the implementation of this project.

4. REGISTRATION DETAILS

All bidders shall furnish valid certificate of registration as an **installation electrician** and member of a recognized contractor association, i.e. **Electrical Contractor's Association and/or Department of Labour**

5. REQUIREMENTS FOR ISSUING OF AN ELECTRICAL CERTIFICATE OF COMPLIANCE

Only a registered person may issue a certificate of compliance accompanied by the required test report only after having satisfied himself or herself by means of an inspection and test that a new electrical installation complies with the provisions of regulation and was carried out under his or her general control; or an electrical installation which existed prior to the publication of the current edition of the health and safety standard incorporated into these Regulations. If at any time prior to the issuing of a certificate of compliance any fault or defect is detected in any part of the electrical installation, the registered person shall refuse to issue such certificate until that fault or defect has been rectified.

6. STANDARD SPECIFICATIONS, BYLAWS & REGULATIONS

- NRS – National Rationalised Specification
- SABS – South African Bureau of Standards
- SANS – South African National Standards
- ISO – International Organization of Standardization
- SANS 10142-1 – The wiring of premises Part 1: Low-voltage installations.
- ISO 9000 – A series of standards, developed and published by ISO, that define, establish and maintain an effective quality assurance system for manufacturing and service industries
- SABS 0157 – Contractual document primarily agreeing on a standard of production and quality between the purchaser and the supplier of goods.
- Sol Plaatje Local Municipality Electricity Bylaw No. 1068, 2006

The equipment and materials supplied and / or the work performed under this contract, shall comply fully with the requirements of the relevant NRS, which shall at all times take precedence over the Sol Plaatje requirements as provided in this technical specification. The onus is on the bid to draw any areas of conflict to the attention of the Municipal Representative, PRIOR TO THE CLOSING OF BIDS.

Where no NRS specification applies, SABS, IEC, and other relevant international specifications shall apply to the scope of this contract.

All electrical equipment installed by users must be SANS 10142- 1 compliant, as a method of enforcing minimum safety standards. All prospective bidders and suppliers shall conform to this; any non-compliance shall be highlighted in a covering letter to the bid document.

In terms of the quality management requirement, all contractor activities and processes must comply with the relevant parts of the ISO 9000 standards or SABS 0157.

7. GUARANTEES

All equipment and materials supplied and work performed under this contract shall be guaranteed against faulty workmanship and materials for a period of 12 calendar months from the date of installation of such equipment and / or works.

8. QUALITY CONTROL

In coming goods and field works will be inspected for completeness, specification compliance, and condition on delivery. The onus is on the contractor to verify his satisfactory performance in all of these respects.

The transformer and other system neutrals are, solidly earthed. Fault levels should not exceed 20 KA and voltage fluctuations plus and minus 10 %.

13. LIGHTNING PROTECTION

The contractor must guarantee his equipment against failure due to lightning and ensure that sensitive items are protected by adequately- rated surge suppressors.

14. LABELLING

The preferred labelling convention is traffolite – type with white lettering on an orange background.

Labels shall be fixed permanently in position unless loose supply is specifically requested.

15. DUST AND WATERPROOFING

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging). Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

Includes price quotations, advertised competitive bids, limited bids and proposals.

Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
