SPECIFICATIONS:

Cathodic protection (CP) is a technique used to control the corrosion of a metal surface by making it the cathode of an electrochemical cell.

FOR INSTALLATION:

There must be an anode and a cathode.

There must be an electrical potential between the anode and the cathode.

There must be a metallic path between the anode and the cathode this will be the pipeline itself.

The anode and cathode must be immersed in an electrically conductive electrolyte which is ionized meaning that some of the water molecules (H₂O) are broken down into positively charged hydrogen ions H⁺ and negatively charged hydroxyl ions (OH⁻). The usual soil moisture surrounding pipeline normally fulfils this condition.

Cathodic protection (CP) is a technique used to control the corrosion of a metal surface by making it the cathode of an electrochemical cell. The simplest method to apply CP is by connecting the metal to be protected with another more easily corroded metal to act as the anode of the electrochemical cell. Cathodic protection systems are used to protect a wide range of metallic structures in various environments. Common applications are; steel water or fuel pipelines and storage tanks; steel pier piles; offshore oil platforms and onshore oil well casings and metal reinforcement bars in concrete buildings and structures. Cathodic protection can, in some cases, prevent stress corrosion cracking.

CONTROL is the power to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities and **INVOLVEMENT** refers to the degree / percentage active involvement in the day to day activities of the enterprise. Therefore the percentage indicated must be the percentage active involvement of individuals who have control over the enterprise and are shareholders.

The Equity Ownership will be equated to the percentage active involvement for scoring and evaluating points.

METHOD OF POINTS CALCULATION (Continued)

ESTABLISHMENT OF HDI EQUITY OWNERSHIP IN AN ENTERPRISE

Equity ownership shall be equated to the percentage of an enterprise which is owned by individuals classified as HDI's, or in the case of a company, the percentage shares that are owned by individuals classified as HDI's, who are actively involved in the management and daily business operations of the enterprise and exercise control over the enterprise, commensurate with their degree of ownership.

Where individuals are not actively involved in the management and daily business operations and do not exercise control over the enterprise commensurate with their degree of ownership, equity ownership may not be claimed.

ADJUDICATION USING A POINT SYSTEM

The bidder obtaining the highest number of points **may** be awarded the contract.

Preference points shall be calculated after prices have been brought to a comparative basis.

Points scored will be rounded off to 2 decimal places.

In the event of equal points scored, the bid **will** be awarded to the bidder scoring the highest number of points for specified goals.

POINTS AWARDED FOR HISTORICALLY DISADVANTAGED INDIVIDUALS

Equity claims for a trust will only be allowed in respect of those persons who are both trustees and beneficiaries and who are actively involved in the management of the trust.

Documentation to substantiate the validity of the credentials of the trustees contemplated above must be submitted.

Listed companies and tertiary institutions do not qualify for HDI preference points.

A consortium or joint venture may, based on the percentage of the contract value managed or executed by their HDI-members, be entitled to preference points in respect of an HDI.

A person awarded a contract as a result of preference for contracting with, or providing equity ownership to an HDI, may not subcontract more than 25% of the value of the contract to a person who is not an HDI or does not qualify for the same number or more preference for equity ownership.
